Assignment Due: March 23, 2023

Dear Prime Minister of India,

Hello, I am Saunak. I am writing this letter to express my concern about the Malnutrition for general public in the India. Recent news of the health issues which below poverty line person face have brought this issue to the public's attention and immediate action is required to solve it.

Many individuals in India face the constraint of the Malnutrition each year. Hunger, disease, and inclined number of patient in the hospital are included in this. The primary issue is that poor people do not get enough amount of food which is needed by the person to survive and this is something serious issue.

In today's date inflation is the main problem which generate such situation. Companies or Organizations where labourers work get paid off very less, which cause this kind of situation. Because of the less salaries workers try to save their income and compromise with their health. Few people even do not get enough salaries to get food for them and their families.

NGO's are coming forward to solve this issue of Malnutrition. Undoubtedly this kind of NGO's are working day and night but this is something really serious dilemma which can not be handover to the NGO's or someone who want to solve it by their own.

These are all very serious problems which must be solved by the Government of India. In fact, I understand that these constraints cannot be simplified immediately but take some measures as soon as possible to get rid of these issues. Here are some ideas which can help you in order to make our society safer. Inaugurating the services, which can provide free food to the people who are below the poverty line, or Government can provide money to this kind of citizens for their food expenses only. I request you to take these measures to ensure the safety and security of all individuals and communities in our country.

In abbreviation, make this issue as a priority to solve and take every possible step to get rid of this situation, so that everyone in our country can live a healthy and prosperous life.

I look forward to your response.

Thank you.

Best Regards,

Saunak Patel
